

Product Data Sheet

Product: Silverhook All-Season Screenwash; SHX01

Usage: Vehicle windscreen and headlight washing systems.

It is added to water to provide a cleaning liquid used all year round, and used in different concentrations to provide different levels of frost protection to the wash system. De-icing concentrate may also be used in hand-held de-icing sprays.

Silverhook All-Season screenwash is an environment-friendly premium grade screenwash and de-icing concentrate especially designed to meet the stringent performance standards of today's automotive industry. Due to its specific formulation properties, provides maximum freezing protection, surpasses the highest cleaning standards, does not affect synthetic surfaces and can be filled in retail packaging without fire or hazard warning symbols.

- Safe and environment-friendly formulation: (contains no Methanol, EDTA, phosphates, amines or nitrites)
- High Flashpoint ($\geq 23^{\circ}\text{C}$) *: both concentrate and diluted product require no fire or hazard warning symbols and ADR exemption can be obtained for certain packaging sizes
- Cleaning performance exceeds standards set by German Institute
- Does not affect polycarbonates, lacquers or rubbers

Dilution ratios for Sachet formula screenwash:

Summer- 1 sachet for 1/2 litre de-ionised water.

Winter- Add additional sachets as required.

Label information: Keep out of reach of children. Keep container lid tightly closed, use only in well ventilated areas. For complete Health and safety information, please see the COSHH data sheet.

Typical freezing point data for Silverhook screenwash formulations:

REF	Freezing point/Deg C undiluted	Freezing point/Deg C diluted 1:1
SHX01	-18	-7

*Does not apply to SHXC formulation
