### **PRODUCT DATA SHEET**

#### **SGA14 RADIATOR FLUSH**

Over time, the build up of sludge and rust can impair the performance of cooling systems. This can lead to blocked coolant channels and subsequent overheating and increased pressure. SilverHook Radiator Flush effectively clears blockages and removes any sludge and rust accumulation. May be used with all radiator types, and is harmless to rubber hoses and gaskets.

#### **Instructions for use**

Pour the contents of the bottle into the Radiator and run engine for 10 minutes at normal working temperature. Turn off engine and allow to cool. When cold, drain the radiator and refill.

#### **Features**

- Removes rust and sludge
- Clears water channels
- Safe with rubber hoses
- Safe with all metals
