PRODUCT DATA SHEET

SGA15 RAD STOPLEAK

SilverHook Stop-Leak for Radiators quickly finds and permanently seals radiator leaks. It is formulated to inhibit the formation of rust and corrosion to help prevent further leaks. Formulated from a blend of surfactants, corrosion inhibitors and sealants. May be used with antifreeze and is harmless to rubber hoses, gaskets and gasket cements.

INSTRUCTIONS FOR USE:

Run the engine to warm the coolant system. After shaking the bottle well, pour the contents into the radiator. Run the engine for a few minutes to allow the treatment to circulate and seal leaks. Top up the coolant if required. Treats a cooling system of up to 12 litres.

PROPERTIES:

- Contains added corrosion inhibitors
- Compatible with all coolants and anti-freeze.
- Protects cooling system
- Helps prevent clogging
- Suitable for Petrol & Diesel Engines
